1. Background of the Company

EPHAAG Farms is an agricultural value chain company headquartered at Yelwa Makaranta, Opposite College of Agriculture, Bauchi State, Nigeria (also reachable at No. 05, Old Bridge, Bauchi State). The company operates as a central buyer within Nigeria's agricultural sector: rather than functioning as a peer-to-peer marketplace, EPHAAG Farms produce and sources produce directly from a nationwide network of registered farmers at standardized prices, and supplies that produce to institutional buyers — companies, organisations, and government bodies — through a coordinated procurement, processing, storage, and distribution pipeline.

The company's structure links farmers, buyers, processors, transporters, and distributors under a single value chain, supported by a farmer loan programme, a Research, Training & Consultancy (RTC) arm, and its own company-managed farms. [Founded, 2022]

2. Company's Target

EPHAAG Farms aims to scale its farmer network and buyer base nationwide, strengthen food security through a reliable and traceable agricultural supply chain, and build a sustainable investment vehicle that channels capital directly into productive farming activity across Nigeria

3. Objectives of the Company

- To build a dependable, standardized agricultural supply chain connecting farmers to institutional buyers nationwide.
- To improve smallholder farmers' access to affordable financing through the company's loan programme.
- To guarantee fair, consistent pricing for farmers while maintaining reliable supply for buyers.
- To strengthen farmer capacity through free research, training, and consultancy services.
- To create a secure, transparent investment channel through which individuals can participate in and benefit from agricultural growth.

4. Motivation and Gaps the Company is Filling

Nigeria's agricultural sector remains constrained by a fragmented supply chain, inconsistent pricing, limited farmer access to formal credit, and weak linkages between smallholder farmers and reliable institutional buyers. Produce is frequently lost to poor coordination between sourcing, processing, and distribution, while farmers often lack the capital or training needed to scale production.

EPHAAG Farms was established to close these gaps — standardizing pricing, formalizing the path from farm to buyer, and extending credit and training to farmers who would otherwise be excluded from formal agricultural financing. The company's investment plans exist to widen this impact further, allowing outside capital to fund farmer loans, company-owned production, and value-chain infrastructure, while giving investors a transparent, structured return.

5. The Investment Opportunity

EPHAAG Farms Investment offers two participation plans, both structured around fixed multi-year Return on Investment (ROI) schedules. Capital raised is deployed into the company's agricultural value chain — farmer

loans, company-managed production, and supply chain operations — and secured through a multi-sectoral, multi-commodity risk mitigation strategy.

5.1 Monthly Investment Plan (₦5,000 and above)

The investor selects a monthly contribution amount of ₦5,000 or above, based on personal financial capacity, and makes consistent monthly payments for the agreed tenure. ROI is calculated on the total amount invested annually, as follows:

Year	Return on Investment (ROI)
Year 1	10%
Year 2	20%
Year 3	30%
Year 4	40%
Year 5	50%

4.2 Bulk Investment Plan – One Time Payment (₦100,000 and above)

The investor pays the full investment amount at once, with a minimum of ₦100,000. ROI is calculated as follows:

Year	Return on Investment (ROI)
Year 1	20%
Year 2	25%
Year 3	30%
Year 4	35%
Year 5	50%

5.3 Partner Investor Status & Referral Incentives.

- An investor qualifies as a Partner Investor upon reaching ₦1,000,000 in total investment, or ₦250,000 in investment combined with 25 total referrals.
- Partner Investors receive an additional 10% compensation for every 10 referrals made per annum, and 50% annual compensation after the first 5-year contract term.
- All investors, regardless of tier, earn a 0.005% bonus for each referral made.

6. Terms and Conditions

1. Invested capital cannot be refunded before the expiration of the agreed investment tenure.
2. Monthly investment payments cannot be stopped halfway, the agreed duration.
3. Inconsistent monthly payments are not accepted.
4. An investor who stops payment halfway through the agreed tenure forfeits 5% of the profit; inconsistent payment forfeits 2% of the profit per month of inconsistency.
5. EPHAAG Farms will secure investor capital through a multi-sectoral and multi-commodity risk mitigation strategy.
6. Partner Investor status requires a minimum of, ₦1,000,000 in total investment, or ₦250,000 in investment together with 25 total referrals.
7. Partner Investors receive an additional 10% compensation for every 10 referrals per annum, and 50% annual compensation after the first 5-year contract.

8. All investors are entitled to a 0.005% bonus for every referral made.
9. EPHAAG Farms will not be held accountable for any payment made to personal account rather than company's official account.

7. Agreement

This Agreement is entered into between EPHAAG Farms and _____, by signing, both parties confirm that they have read, understood, and agree to be bound by the Investment Plans and the Terms and Conditions set out in this proposal.
